

In Reception Class we looked at article 24

Every child has the right to the best possible health.

We looked especially at how children have the right to clean water.

We watched videos of children walking for miles everyday to collect water. We wanted to know how it felt so we filled a bucket up with water and tried to carry it across the yard.

We found it hard to pick the bucket of water up because it was so heavy.

I wasn't strong enough to pick the bucket of water up.

When I tried to pick it up, it spilled all over me!

# The water spilled all over the floor!

Some of us managed to walk a few little steps with the bucket.

We didn't manage to carry the bucket of water very far!

We then looked more closely at the water they were collecting.
